University (Diplomatura 3 yrs) Ciclos Formativos de Grado Superior	(18 – 21 + yrs)
University (Licenciatura 2 yrs) University Post Degree (2 yrs)	(18 – 22 + yrs)

Apprenticeship and Traineeships in Spain:

APPRENTICESHIP

The target groups for mobility are people in Initial or Continuing VET.

IVET:

- learners keep their status of students**
- is non-compulsory education**
- people in this group are aged 16 or older**
- Students need to complete a compulsory work placement of approximately 20% of the total number of hours**
- learners can be either workers or job-seekers,**
- is non-formal education**
- is implemented through training contracts, workshop**

Spain:
laying the foundations for a dual system
in vocational training

DUAL SYSTEM:

When?

It was set in November 2012

What is it?

It is intended to close ties between companies and VET providers, joining forces and promoting a greater involvement of learners in the workplace during the training period.

Its aim is:

- to increase youth employment.
- to obtain vocational qualifications within the education system or Vet for employed and unemployed people.

Spain:

Training for youth employment

To improve the skills and employability of young people under 30 and to increase job skills, the Spanish public employment service has established three types of training actions:

- training activities in economic sectors with better prospects for growth and employment;
- training activities to hiring youngsters by companies;
- training actions linked to obtain professional certificates.

ADVANTAGES:

Unemployed youngsters participating in this programme will have access to scholarships and grants, on the basis of conditions specified for each case.

WHERE WE HAVE BEEN:

Economic context in Aguilar

Talking about the economy, in Aguilar the main centre of workspaces is the biscuits factory “Gullón”, that gives employment to almost a quarter of the entire population of Aguilar de Campoo.

LA GALLETA QUE QUIERES

GALLETAS GULLÓN

Cookies Gullón is one of the first biscuits factories in Europe and one of the leading food companies in Spain. The company was founded in 1892 by D. Manuel Gullón .. In 2003 the Gullón factory opened in Aguilar de Campo, and it is the largest and the most automated in Europe, with over 100,000 square meters and a warehouse with a capacity of 18,000 meters for 27,000 pallets.

LA GALLETA QUE QUIERES

TOURISM CONTEXT:

The privileged location of the capital of Burgos lets visitors cover the whole province by following interesting routes to the heart of Castilla-Leon. The most important monument is the Cathedral.

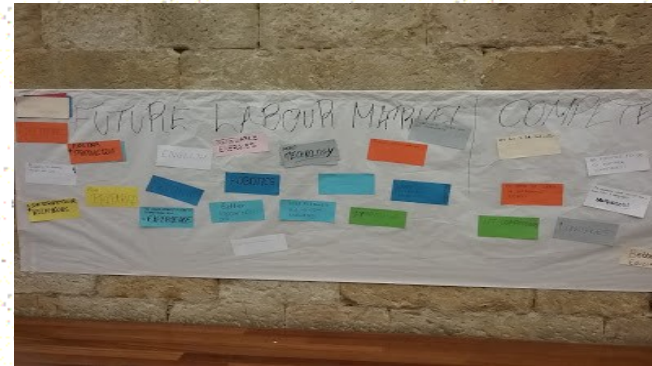

The historic centre of Valladolid, the city on the Pisuerga River, is home to an interesting collection of Renaissance architecture comprising houses, palaces and emblematic buildings such as the Cathedral.

CONFERENCES

El Norte de Castilla

We visited the newspaper “Norte de Castilla” in Valladolid, where a woman talked about the newspaper and the opportunities of apprenticeship they offer to Spanish students.

The last day Mr Bueno Gumerindo talked about the skills we need to have to be a perfect worker and he made us express our opinion about the job situation in 10 years and which kind of knowledge we will be requested to have.

OUR RADIO EXPERIENCE

We experienced the difficulty of talking on a radio. The first day Elena, from Rovigo, two guys from Newport and a teacher from Finland took part in a radio programme for the local radio of Aguilar.

Then we took part in another radio programme where they asked us about the project Erasmus+ and about our week there in Spain.
